Section 22 – could you please check and update this, and send it back to Section 22 ? I've updated everything except for the state-by-state reduction in electricity and gas prices.

I think it is worth including what happened to electricity prices in the September quarter, but maybe given gas prices rose in September then fell in December, it isn't worth giving a state by state breakdown on these – what do you think?

The other option would be to give the breakdown based on change between June and December.
